EXPERIENCE

- Front-end development, edunet foundation**06/2024 – 07/2024
- Finished an 8-week internship as a Front End Developer at the Edunet Foundation, where I started and further improved various web applications. During that time, I was able to work directly with HTML, CSS, and JavaScript.
 - Successfully completed the IBM SkillsBuild Front End Development course to attain advanced learning in modern web development techniques and best practices.
 - Designed a student portfolio project using HTML, CSS, and JavaScript, showing my abilities in responsiveness and interactivity of the web design.
 - The internship allowed work in a team: troubleshooting sections of the code to optimize application performance and enhance UX.

PROJECTS

- Hostel Management System**04/2024 – 05/2024
- Description: Developed admin interface for student details management, room allocation, rent tracking, and work assignments with search, update rent details, delete and display functionalities.
- Outcome: Streamlined hostel administration, enhancing efficiency through automated processes, transparent communication, and optimized resource utilization.
- Advanced Credit Card Fruad Detection**09/2024 – 11/2024
- This project integrates classification and regression models to enhance credit card fraud detection. Classification identifies fraudulent transactions, while regression analyzes spending patterns and anomaly scores. The approach improves accuracy, reduces false positives, and strengthens real-time fraud prevention.

EDUCATION

- Bachelor of Technology**10/2022 – present
- SRM-AP UNIVERSITY
Course work: Course work: C, Python, C++, Data Structures And Algorithms, OOPS Concept, DBMS, Web Technology
(CGPA : 8.6)
- Intermediate**09/2020 – 05/2022
- Krishna Chaitanya Junior College
Branch: MPC

SKILLS
